

# Environmental Policies of the Public University Corporation, the University of Aizu

Date: April 1, 2018

Ryuichi Oka  
The Chairperson of the Board of Executives,  
The Public University Corporation,  
The University of Aizu

## 1. Fundamental Missions

The Public University Corporation, the University of Aizu and its Junior College Division is aiming to contribute to academic and science technology in the fields of computer science engineering, industrial informatics, food science and nutrition, and early childhood education through developing talents and research achievements, as well as contributing on advancement of industries and culture in global society.

In modern society, the global environment has drastically changed through global warming, for example, caused by current lifestyles based on large-scale consumption of limited natural resources and energy. This has threatened the very foundation of survival for creatures living on the planet, including humans, more seriously than ever.

Given such circumstances, we will promote systematic global warming prevention. Government of Japan established their global warming prevention plan in 2016, and that of Fukushima prefecture was revised in 2017.

At the Public University Corporation, the University of Aizu, individual faculty, administrative personnel members, and students have determined to proactively address these issues regarding environment conservation, aiming to create a sustainable recycling-oriented society and to realize a sustainable development of global society where humans can coexist with nature. Accordingly, environmental policies shall be provided for herein.

## 2. Fundamental Policies (Environmental Policies)

- (1) The Public University Corporation, the University of Aizu shall determine its environmental goals based on its fundamental missions, and promote activities to minimize its burden on the environment.
- (2) The Public University Corporation, the University of Aizu, including all faculty members, administrative personnel, and students, shall participate in and steadily promote activities to minimize its burden on the environment.
- (3) The Public University Corporation, the University of Aizu shall increase awareness of environment conservation among faculty members, administrative personnel, and students, and encourage them to proactively participate in activities towards conservation of the environment
- (4) The Public University Corporation, the University of Aizu shall observe relevant laws, etc. and make continuous efforts to improve an environment management system in order to further reduce its burden on the environment.
- (5) The Public University Corporation, the University of Aizu shall make these environmental policies broadly known to the general public, including faculty members, administrative personnel, students, tenants, and associated vendors.
