UNIT TWO (approx. 14 minutes)	Incomplete Sentences	7
	Text Completion	4
	Reading Comprehension	9

TOEIC L&R IP Online Test

- CAT (Computer adaptive Test) allows to shorten to **1hour!!**

CAT (Computer adaptive Test)

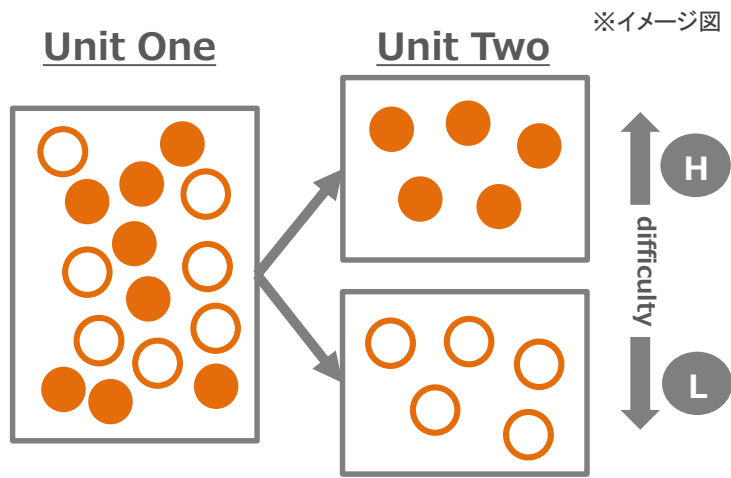

An adaptive test system that changes the test questions to be asked according to the examinees' abilities.
Practical operation becomes possible by using a computer. Adaptive tests use difficulty questions based on each candidate's ability.
A performance measurement is performed. Therefore, it is possible to calculate the candidate's ability (score) with a small number of questions (= short time).
In addition, it is possible to score on the spot and display the score immediately after the test.

Multi-Stage Adaptive

TOEIC L&R IP Online Test

At first stage (Unit One), all test takers will answer same 25 items (both Listening and Reading section). After that, 20 items based on correct answer rate by each test taker at first stage will be assigned.

Item Adaptive
