

# Let's study Japanese

Name: Nguyen Van Duc (PhD)  
Country: Vietnam  
Lab: Computer Communications Lab.  
Supervisor: Prof. Cong-Thang Truong  
Job: Researcher at KDDI Research Inc.,  
Tokyo.  
JLPT: N1

## Who am I?

My name is Nguyen Van Duc. I come from Vietnam. I have been studying at the University of Aizu for 7 years since I was an undergraduate student. I completed my PhD study this September and will be working as a researcher at KDDI Research Inc. in Tokyo from October.

## Why study Japanese?

- Your living will be much more comfortable. Calling a taxi, asking for directions, doing paperwork at city hall, looking for past-time job, and joining university's clubs are easy with basic Japanese 😊
- You can make new friends. Japanese students are often "shy". Talking to them in Japanese is a great way to make friends 😊
- A great way to explore Japan culture. If you are a fan of manga, I believe it is best to read them in Japanese. 😊
- If you want to find a job and work in Japan, knowing Japanese is a huge advantage. At least, you will have double number of available companies 😊
- It is FREE 😊
