**JLPT:** N5

## Let's study Japanese!

### Who am I?

My name is Veranika, I came from Belarus. I am a Master student at the University of Aizu.

### Why study Japanese?

It is possible to survive without Japanese, believe me, I live in Japan for 2 years, and I passed only N5 :), BUT! I realized that it is so much fun and enjoyable to understand what people ask you, so I decided to continue learning Japanese.

### How to study Japanese?

Everyone has their own methods, and I can only say that works for me. I always try to postpone learning Japanese because I want to do the research first and blah-blah, SO, I need a deadline. I signed up for JLPT, and it was a hard month before the exam, but I significantly improved my Japanese. All you need is practicing every day! Attend the Kusakari sensei lessons (she is fantastic), do the exercises from books, watch anime, listen to Japanese songs, talk to Japanese students, you can choose what you like, but do it every day, you need to enjoy the process.

Little by little, step by step, you will improve your skills!
